

Curriculum Vitae

Michel Raymond, PhD

Directeur de Recherches

Institute of Evolutionary Sciences, CNRS, University of Montpellier II

michel.raymond@univ-montp2.fr

Research Interests.

Outline: How evolution proceeds has always attracted my interest: the mechanisms of evolution, particularly the driving forces and the limits of natural selection, the construction of adaptation and the understanding of maladaptation. The human species is particularly attractive, due to its peculiar social structure and the importance of culture.

Key words: Human evolutionary biology; family ecology; genetics of adaptation; population genetics; evolution of sexual preferences; evolution of handedness; attractiveness; menopause; paternity uncertainty.

Education

- HDR, 1993, Evolutionary biology (genetics of adaptation), University Montpellier 2, France
- Ph.D., 1986, Evolutionary biology (genetics of adaptation), University Montpellier 2, France
Supervisor: Dr. Nicole Pasteur
- M. Sc., 1982, Plant-insect co-evolution, University Montpellier 2, France

Professional Experience

- 2012 – : Directeur de Recherches Classe exceptionnelle
- 1995 – 2011 : Directeur de Recherches CNRS, Montpellier, France
- 1994 : Sabbatical leave, Uppsala, Sweden
- 1988 – 1995: Chargé de Recherches CNRS, ISEM, Montpellier, France
- 1986 – 1987: Post-doctoral research fellow, Univ. California Riverside, USA

Awards

- 1991, CNRS bronze medal
- 1998, CNRS silver medal
- 2003, Honorary professor, Institute of Zoology, Beijing, China

Publications (2012)

Overall : 216 publications, including 170 in peer reviews journals (ca. 6.3 per year) and globally they have been cited 15,873 times (Web of Science, 9 February 2012), and 8,023 times excluding one highly cited paper. $H = 43$.
